

Tips and tricks for the new Microsoft Edge

Learn how to get the most from the browser for business.

Multiple profiles + sync

Create multiple profiles to keep work and personal browsing separate. Roam your settings, favorites, and passwords across devices and accounts with cross-device sync.

Enterprise new tab page

Turn your new tab page into a personalized portal for productivity. Set the page content to Office 365 for access to intelligent suggestions, frequented sites, and recent documents.

Microsoft Search in Bing

Search your corporate network just like the web. Find files, people, locations, and even acronyms right from the search bar or new tab page when using Bing.*

**Your new browser is waiting.
Look for the new icon to try.**
